题目考点

解题思路

We open sherlock and search for the given username

```
1 python3 sherlock hoshimaseok
```

We get lots of useful results from Facebook, Github, Instagram, Reddit and Twitter. We check them one by one to eliminate false positives and end up with the Github account: https://github.com/hoshimaseok(in hindsight the challenge name is a clue :P). We see a repo named `SomethingFishy` *and we look into the commit history. We check them one by one and we see a commit message* `feat: Looking for flag?`*. Looking at that we see a lot of hebrew text which sadly was a distraction and did'nt give us any useful information. Looking into the other commits we see that the commit* `fix: userSchema.js fix` *has a deleted* `.env` *file with the flag.*

Flag

```
1 csictf{sc4r3d_0f_c0mm1tm3nt}
```
