题目描述

This is a super secure portal with a really unusual HTML file. Try to login.

题目考点

解题思路

In the sourcecode, an unreadable script is at the end. The javascript code can be deobfuscated to an extent with <http://www.jsnice.org/>. The script still has a lot of useless functions. On replacing all necessary values into the corresponding locations, we get a final script of

```
1 window["localStorage"]["setItem"] ("9-12", "BE*");
2 window["localStorage"]["setItem"] ("4-7", "bb=");
3 window["localStorage"]["setItem"] ("0-2", "5W");
4 window["localStorage"]["setItem"] ("16", "^7M");
5 window["localStorage"]["setItem"] ("12-14", "pg");
6 window["localStorage"]["setItem"] ("7-9", "+n");
7 window["localStorage"]["setItem"] ("14-16", "4t");
8 window["localStorage"]["setItem"] ("2-4", "$F");
```

From here, its clearly visible that that the password is just rearranging this into increasing order of key. On entering the password, the flag is obtained.

Password: 5W\$Fbb=+nBE*pg4t^7M

Flag

```
1 csictf{l3t_m3_c0nfus3_y0u}
```
